WHAT'S NEW IN VERSION 24.04.22

Improvements

User Management / Assigning a user to specific sites.

This release improves user access management by providing the ability to assign a user to a site or list of sites so that the assigned user can only access those sites.

- Admin of an organization will have the right to view all sites, devices, etc. of that organization.
- If the user is non-admin, they will just see schedules created by them.
- User Management Popup page has Pagination mechanism to handle more than 100 thousand records.
- Gilbarco Ids and store number filters will show the data in dropdown as per sites assigned to the user.
- Created Tabs or Toggle in User Management Page to switch between Instore and Forecourt.

Bug Fixes

Forecourt user management

- The user does not see all the site assigned via User Management was resolved.
- Sites containing FlexPay 6 devices are displayed, even though these sites were not assigned to the user via user management was resolved

Known Issues

- None known at this time.
